

Enable EC2 Memory & Disk Monitoring using CloudWatch Agent

Step 1: SSH into the EC2 Server

Example: `ssh ec2-user@<EC2-Public-IP>`

Step 2: Create an IAM Role with the policy CloudWatchAgentServerPolicy

Go to AWS Console → IAM → Roles → Create Role

Trusted entity: AWS Service

Use case: EC2

Attach Policy: CloudWatchAgentServerPolicy

Step 3: Attach the IAM Role to the EC2 instance

AWS Console → EC2 → Instances

Select Instance → Actions → Security → Modify IAM Role

Select the created role and update

Step 4: Install the CloudWatch Agent

Command:

```
sudo yum install amazon-cloudwatch-agent -y
```

Step 5: Create the CloudWatch Agent configuration file

Command:

```
sudo nano /opt/aws/amazon-cloudwatch-agent/etc/amazon-cloudwatch-agent.json
```

Paste the following configuration:

```
{
  "agent": {
    "metrics_collection_interval": 300,
    "run_as_user": "root"
  },
  "metrics": {
    "append_dimensions": {
      "InstanceId": "${aws:InstanceId}"
    },
    "metrics_collected": {
      "mem": {
        "measurement": [
          "mem_used_percent"
        ],
        "metrics_collection_interval": 60,
        "resources": [
          "*"
        ]
      },
      "disk": {
        "measurement": [
          "used_percent"
        ],
        "metrics_collection_interval": 60,
        "resources": [
          "*"
        ]
      }
    }
  }
}
```

```
}  
  }  
} ]
```

Step 6: Start the CloudWatch Agent

Command:

```
sudo /opt/aws/amazon-cloudwatch-agent/bin/amazon-cloudwatch-agent-ctl -a fetch-config -m ec2 -s -c  
file:/opt/aws/amazon-cloudwatch-agent/etc/amazon-cloudwatch-agent.json
```

Step 7 — Verify Agent Status

Command:

```
sudo /opt/aws/amazon-cloudwatch-agent/bin/amazon-cloudwatch-agent-ctl -a status
```

Expected output:

status: running

Step 8 — Verify Metrics in CloudWatch

Go to:

AWS Console → CloudWatch → Metrics

Open namespace:

CWAgent
